

RAHUL MEENA

Software Developer | Ruby on Rails Specialist

Indore, India | +91-6266488845 | rahulmeena4767@gmail.com | github.com/Rahul123-Rm

PROFESSIONAL SUMMARY

Dedicated and results-driven Software Developer with **4 years** of experience in Ruby on Rails and web application development. Proven expertise in designing and implementing scalable SaaS solutions, REST APIs, and cloud integrations. Skilled in Test-Driven Development (TDD), multi-tenant architecture, and secure authentication systems. Track record of improving system performance by 35-60% through database optimization and infrastructure improvements. Experienced with AI-assisted development workflows and modern DevOps practices. Passionate about delivering reliable, maintainable, and user-centric solutions.

TECHNICAL SKILLS

Backend & Frameworks: Ruby, Ruby on Rails 7/8, REST APIs, ActiveRecord, Service Objects, ActionCable, ActiveAdmin, FCM

Frontend: React.js, Hotwire, Turbo, Stimulus, JavaScript (ES6+), TypeScript, HTML, CSS, Tailwind CSS

Databases & Cloud Storage: PostgreSQL, Redis, Sidekiq, SQLite, AWS S3, MinIO, Database Indexing, Active Storage

Authentication & APIs: JWT, RBAC, OTP, Razorpay API, QuickBooks Integration, Firebase Cloud Messaging (FCM)

DevOps & Infrastructure: Docker, Kamal, Linux, Git, CI/CD, Grafana, VPS Management

Architecture & Testing: MVC, Multi-Tenant Systems, RSpec, TDD, Cron Jobs, PDF Report Generation, Real-Time Applications

AI & Developer Productivity: GitHub Copilot, Cursor, ChatGPT, Claude, OpenAI APIs, AI-assisted development workflows, automated testing and documentation

SEO & AEO: Search Engine Optimization (SEO), Answer Engine Optimization (AEO), content and metadata structuring for discoverability

Core Competencies: SaaS Development, API Integration, Database Optimization, Performance Tuning, Authentication & Authorization, Real-Time Applications, Agile Development

WORK EXPERIENCE

SDE-1 | Infivizz (Contractual) | Jan 2025 – March 2026

Media Management Platform | Ruby on Rails 7/8, PostgreSQL, Redis, Sidekiq, AWS S3, React.js, Tailwind CSS, Docker, Kamal

- Improved media upload reliability by ~60% and reduced backend load by ~45% by implementing resumable uploads using Uppy.js, AWS S3 multipart upload, Active Storage, and pre-signed URLs.
- Reduced hiring workflow processing time by ~40% by building secure, role-based React and Ruby on Rails APIs with RBAC, JWT, and OTP authentication, enabling controlled access and real-time feedback.
- Improved database query performance by ~35% by designing optimized multi-tenant schemas, adding ActiveRecord indexing, and enforcing business logic through service objects.
- Implemented background job processing pipelines using Sidekiq and Redis for asynchronous operations.
- Designed Docker and Kamal deployment pipelines for efficient production releases.

SDE | Oaktreecloud Pvt. Ltd. | Mar 2024 – Nov 2024

Bestclass Project (Educational Platform) | Ruby on Rails, PostgreSQL, React.js, Tailwind CSS

- Integrated QuickBooks for seamless financial management, including invoice and sales receipt generation.
- Automated user creation validations with JavaScript for improved data accuracy and user experience.
- Implemented secure role-based access control and user management workflows using ActiveAdmin.
- Optimized database queries and API performance through indexing strategies.

SDE | Precious Infosystem | Mar 2022 – Mar 2024

Dahlia Dating App | Ruby on Rails, PostgreSQL, Redis, Sidekiq, Razorpay, MinIO, Docker

- Implemented subscription billing workflows with secure Razorpay payment gateway integration, handling recurring payments and transaction management.
- Built scalable storage and admin management features using MinIO with Amazon S3-compatible storage for image handling via ActiveAdmin.
- Developed subscription and gameplay dashboards for monitoring and analytics.
- Implemented background job processing using Sidekiq and Redis for email notifications and report generation.
- Improved system reliability through RSpec TDD, PDF report generation, and scheduled cron jobs.
- Containerized applications using Docker for consistent development and production environments.

KEY ACHIEVEMENTS

Performance Optimization: Consistently delivered 35-60% improvements in system performance through database optimization, API efficiency, and infrastructure enhancements.

Scalability & Architecture: Designed and implemented multi-tenant systems, real-time applications with ActionCable, and secure authentication mechanisms supporting enterprise-grade applications.

DevOps & Deployment: Reduced production deployment time and improved release reliability through Docker and Kamal automation.

AI-Driven Development: Leveraged GitHub Copilot, Cursor, and Claude for enhanced productivity in automated testing, documentation, and code generation.

Technology Leadership: Demonstrated expertise in modern tech stack including Rails 7/8, PostgreSQL, Redis, AWS, and React, driving best practices across projects.

EDUCATION

Master of Computer Applications (MCA - Integrated)

IIPS, Indore | Graduated: June 2022
